EX PARTE NOTICE

Ms. Marlene H. Dortch
Secretary
Federal Communications Commission
45 L Street NE
Washington, DC 20554

**Re: *Petition for Rulemaking to Permit MVDDS Use of the 12.2-12.7 GHz
Band for Two-Way Mobile Broadband Service, RM-11768***

Dear Ms. Dortch:

On Thursday, October 29, 2020, Michael S. Dell, chairman and chief executive officer of Dell Technologies, Inc. spoke by video conference with FCC Commissioner Brendan Carr and his legal advisor, Will Adams. Also participating from Dell Technologies were Eminence Griffin, Senior Manager of Government Affairs, and Michael Young, Senior Vice President of Government Affairs. Mr. Dell discussed the importance of Open Radio Access Networks for building out U.S. 5G networks. He indicated that open, interoperable systems would create more opportunities for innovation and allow new entrants into the market than earlier-generation systems. He also encouraged the Commission to continue identifying spectrum for 5G wireless deployment, including the 12.2-12.7 GHz band, and to allow for an open, transparent notice of proposed rulemaking process to determine how that spectrum could be used for 5G.

Please contact me with any questions regarding this submission.

Sincerely,

/s/ Trey Hanbury
